Paper is A white
woodfree
supercalendered paper
with semi gloss
appearance and
specially treated in
black on the back-side
to give optimum
opacity .**

Applications

Key Features

- > Black on the back-side to give optimum opacity
- > Adhesive suitable for a wide range of substrates and applications

Facestock

A white woodfree supercalendered paper with semi gloss appearance and specially treated in black on the back-side to give optimum opacity.

Basis Weight: 80 g/m² ± 10% ISO 536
Caliper: 0.070 mm ± 10% ISO 534

Adhesive

A special purpose permanent rubber based adhesive.

Liner

A super calendered white glassine paper with excellent roll label converting properties.

Basis Weight: 60 g/m² ± 10% ISO 536
Caliper: 0.052 mm ± 10% ISO 534

Performance data

Loop Tack (st, st) -FTM 9: 18.0
20 min 90° Peel (st, st) -FTM 2: 9.0 or Tear
24 hour 90° Peel (st, st) -FTM 2: 11.0 or Tear
Min. Appl. Temp. 4 °C
after labeling, 24h Service Temp. -53° to 70 °C

Adhesive Performance

The permanent rubber based adhesive combines high initial tack with excellent adhesion properties on a wide range of substrates especially card paper.

Applications and use

Opaque 'coverall' materials are traditionally used for overlabelling of errors or size changes on existing printed materials – or for barcoding where the underlying substrate may interfere with scannability. It is also used for the relabeling of obsolete pre-printed packaging for inventory control purposes. The above does not represent any guarantee or warranty and the Purchaser must independently determine the suitability of the products for the Purchaser's purposes.

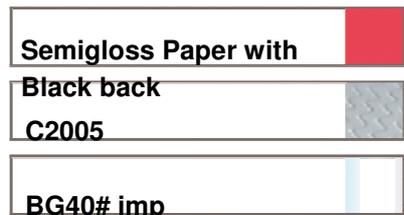

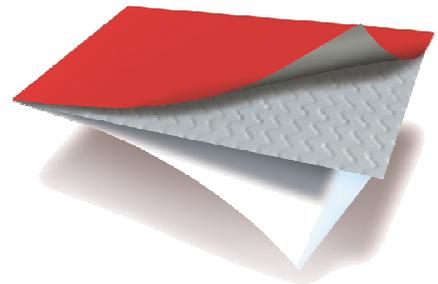

Conversion/printing

The product can be pre-printed by all conventional roll label techniques including water based flexo, UV letterpress and offset. If required the labels can be upgraded to a higher gloss level by additional varnishing.

Shelf life

One year when stored at 23 ± 2 °C at 50 ± 5% RH.
